

Annual Operations Report 2026

Executive summary

This sample document is published by Malina Data as a test file for the Document Text Extractor Actor. It contains headings, paragraphs and a table so that every output mode of the Actor can be demonstrated on a file that is always available and free to download.

Revenue by region

Revenue grew across all three regions during the year. Growth was strongest in South East Asia, where the number of active accounts more than doubled after the launch of the local payment options.

Region	Q1	Q2	Q3	Q4
Europe	120	140	155	162
South East Asia	90	115	180	240
North America	210	205	220	236

Costs

Operating costs stayed flat year on year. Hosting was the only line that increased, driven by higher document processing volume in the fourth quarter.

Outlook

The plan for the coming year is to keep the product surface small and to improve extraction quality on scanned documents. Two languages will be added to the optical character recognition option.

Risks

- Supplier concentration in a single region.
- Currency movements between the local currency and the US dollar.
- Dependency on one payment provider for card payments.
